

## Notice of Draft Report for Review

### Environmental Assessment to Increase the Biggars Lane Landfill Disposal Capacity to Meet County's Disposal Requirements to Year 2050

**The Project:** The County of Brant (County) has undertaken an environmental assessment (EA) under the *Ontario Environmental Assessment Act (EAA)* to secure additional solid waste disposal capacity within the County of Brant, based on the approved Terms of Reference (TOR) and conditions of approval for the undertaking. The County is seeking EAA approval to increase the Biggars Lane Landfill disposal capacity to meet the County's disposal requirements to the year 2050.

Biggars Lane Landfill is located in the County of Brant, Ontario, as shown below:

**The Process:** In May 2015, the Ministry of the Environment and Climate Change (MOECC) (now Ministry of the Environment, Conservation and Parks (MECP)) approved the TOR for additional solid waste disposal capacity through expansion of the Biggars Lane Landfill. The approved TOR outlined the County's framework and work plan for fulfilling the EAA requirements during the preparation of the EA.

The County has reviewed options to manage solid waste over the next 30 years. The preferred method of landfill expansion is to implement a separate footprint area of 14.3 ha to the west of the existing landfill footprint with an engineered base (liner) for containment.

The Draft EA Report has been sent to the MECP for review before final submission and is also at this time made available for public review. Information on this project is available at: <http://www.brant.ca/en/explore-our-services/Solid-Waste-Environmental-Assessment.asp>

**Consultation:** Members of the public, agencies and other interested persons are encouraged to review the Draft EA Report and submit comments regarding the report's findings.

The Draft EA is publicly accessible on the County website, a review period of five weeks has been provided to review the EA and submit comments.
