Re: Nith Peninsula
Kulmatycky and Zavarella Properties
Paris, Ontario

Dear Sir:

We would like to take the opportunity to update you with respect to the status of the work being carried out by the County of Brant to bring the Bethel Road Water Supply into the Paris water distribution system.

As you know the County of Brant is / has been installing the watermain from the Bethel Road well site to the intersection of Powerline Road and Rest Acres Road in Southwest Paris. This work is intended to link the existing water system at Powerline Road to the new well system located at Bethel Road. This past week, Brant County Council has awarded a contract to construct the required Bethel Water Treatment Plant (General Construction Contract). This contract is another step in enhancing the water supply that the County has found on Bethel Road into the system to allow additional water supply for the Southwest Paris area. The County continues to indicate that the available water supply will increase in the spring of 2012. This water can be utilized in the development of the Zavarella / Kulmatycky lands on the Nith Peninsula.

The functioning servicing report prepared by our office indicated that through the studies prepared by Azimuth Environmental Consulting Inc, that the current water supply with the Town of Paris was sufficient to service these lands. In fact the Azimuth Environmental Consulting Inc. reports indicate that there is additional water coming on stream through the Bethel Well System and that the water associated with the Airport Aquifer will provide a large capacity for growth in the Paris Area.

This information will supplement our firm's work on the functional servicing of the subject lands.

Professional Engineers
