Attention: Mr. Joe Cohoon, P.Eng.

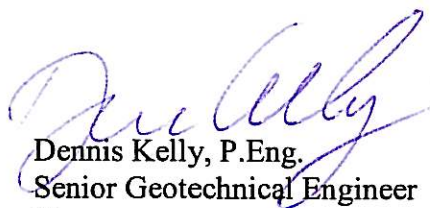

Dear Sir:

**Re: Slope Stability Setback  
Kulmatycky and Bronstetter Properties  
Dundas Street, Former Town of Paris  
County of Brant, Ontario**

Please find attached the Site Development Setback Plan for the above-referenced project. The plan shows the top of bank and the required development setback. The top of bank was established in the field by Naylor Engineering Associates Ltd. and surveyed by J. H. Cohoon Engineering Limited. The development setback line was determined by Naylor Engineering Associates Ltd. and is intended to protect the proposed subdivision infrastructure and buildings against slope stability hazard risks. The setback includes an erosion allowance, stable slope allowance, and erosion access allowance.

We trust that this information is suitable for your present requirements. If you require additional geotechnical consultation, please contact our office.

Yours very truly,

Dennis Kelly, P.Eng.  
Senior Geotechnical Engineer
