

Notice of Study Commencement Municipal Class Environmental Assessment

County Of Brant Cainsville Water and Wastewater Servicing

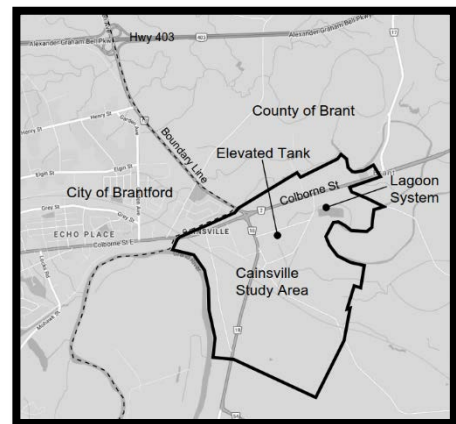

Engage with us!

The County of Brant invites you to engage with us as we begin to study and evaluate ways to provide water and wastewater servicing to the entire Cainsville community.

The County of Brant is undertaking a Schedule 'C' Class Environmental Assessment (Class EA) for Water and Wastewater servicing in the Cainsville community. The study will be completed in accordance with the Class EA process (Municipal Engineers Association, June 2000, as amended in 2007, 2011 and 2015) and the County of Brant Official Plan and in light of the Boundary Adjustment Agreement with the City of Brantford.

Most of the existing Cainsville developed areas are on the municipal water system and have sanitary service via local sanitary sewers and the existing Cainsville Lagoon. Some existing residential and employment areas are on private wells and/or septic systems.

The Class EA will consider and evaluate alternatives to provide water and wastewater servicing to the entire Cainsville community as shown in the map. This includes expanding services to currently unserved areas within the settlement boundary. It will identify the preferred drinking water supply, storage and distribution alternative and the preferred wastewater treatment and sanitary sewage collection alternative to prepare for long term growth through to the 2051 horizon.

Public consultation is important to the success of this study. We are interested in receiving your comments. Opportunity for public input will be provided throughout the study, with direct mailings to review agencies and members of the public who have indicated interest. In addition, Public Information Centres (PICs) will be conducted to present the project information and considered alternatives (following Provincial and County social and physical distancing requirements). At the completion of the study, a project file will be made available for 30-day public review.

For further information relating to this project or to be added to the project mailing list, please contact either of the following members of the study team.

This Notice was first issued on August 13, 2020.

Comments and information regarding this Municipal Class Environmental Assessment are being collected in accordance with the *Municipal Freedom of Information and Protection of Privacy Act*. With the exception of personal information, all comments will become part of the public record.
