Brant Community Health Hub Receives the Green Light

County of Brant, ON – On Tuesday, June 16, 2020, County of Brant Council gave the green light for construction of the Brant Community Health Hub. The tender was awarded to Norlon Builders London who will be collaborating with Edge Architects to construct a green state-of-the-art health facility for the Brant community. A ground-breaking ceremony will be planned in the coming weeks.

“In 2018, Council discussed and made a number of decisions related to the development of a health care facility in the County,” said Mayor David Bailey. “A lot of progress and good decisions have been made and we are excited to see the first shovel in the ground.”

The Brant Community Health Hub, located at 25 Curtis Ave. N., Paris, will be approximately 41,365 square feet. It will offer a range of community health care and services under one roof including family physicians, health care practitioners, community support agencies, health supplies, and other health care and social services. Tenant stakeholders will include PrimaCare Community Family Health Team, Cobblestone Medicine and Rehab Centre, Brantford Radiology, Life Labs, Sound Choice Hearing Health Services, Northville Pharmacy, Grand River Community Health Centre, Alzheimer Society, Nova Vita, Participation Support Services, Brant Family and Children’s Services and a number of other related health and social service agencies.

“Improving access to health care and community services in the County of Brant has been identified as a vitally important and growing need,” said Bailey. “The Brant Community Health Hub will provide our community with a stable framework for a healthy community and reduce the burden on an already overextended hospital system. Residents from newborns to seniors will be able to benefit from integrated programs, focused on their needs, close to home.”

The Brant Community Health Hub building will be comprised of sustainable design features such as a vegetated “green” roof, highly insulated building envelope, solar panels, electric vehicle charging stations, and energy efficient fixtures and equipment. Construction will begin in the near future and is expected to be completed in summer of 2021.

The cost of the Brant Community Health Hub is approximately 13 million dollars and a \$1 million dollar fundraising campaign will help lower costs. A number of naming opportunities will be available for major donors who wish to contribute to this important community asset. More information about the fundraising campaign will be shared in the near future. The project is anticipated to be cost neutral to the County of Brant.
