

Farm Buildings with Livestock or Manure Storage

A farm building is defined as all or part of a building that contains an agricultural occupancy. An agricultural occupancy means the use of all or part of a building that is located on land that is associated with and devoted to the practice of farming, and is used for the purpose of producing crops, raising farm animals, or preparing, marketing, storing or processing agricultural products.

Building permits are required for all farm buildings greater than 10 square metres (108 square feet), such as equipment storage, grain bins, and silos. Farm buildings greater than 600 square metres in size must be designed by a professional engineer. If the farm building is **not going to contain livestock or manure storage**, please refer to the Farm Buildings checklist.

Building permit application submission requirements:

In many instances, before a building permit application can be processed and a permit issued, there are other approvals from other agencies that are required. These approvals are not administered by the Building Division and are required as part of a complete application package. Please consult the applicable law checklist prior to applying for a building permit.

This checklist provides a summary of the Building Permit submission requirements for **farm buildings with livestock or manure storage** and has been developed for convenience purposes only. The property owner is responsible for ensuring compliance with all County of Brant By-laws, other applicable laws, and the Ontario Building Code.

- Permit applications to be filled out and signed
- Authorization form (if applicable)
- Commitment to General Review form completed by the owner and professional engineer (if building is greater than 600 square metres or requires a professional engineer)
- Designer information 'Schedule 1' to be filled out
 - Designer's name, Building Code Identification Number (BCIN), and signature must appear on all drawings submitted.
 - Property owners exempted from qualification must fill-in the form to specify the reason for exemption.
- Complete Minimum Distance Separation Calculation form (MDS II)
 - Provides the minimum distance separation between proposed new, expanding, or remodeled livestock barns, manure storages, and/or anaerobic digesters and existing or approved development
- Site plan, including:
 - The address or roll number (beginning with 2920) of the property
 - All property lines and surrounding streets labelled

- All proposed and existing buildings and structures on the property labelled
 - Proposed distance from all legal property lines (not street lines, sidewalks, etc.)
 - Location of septic system (if applicable) and distance to proposed building(s)
 - Distances to Type A and Type B land uses
 - Total number of livestock and type of manure
 - Farm business registration number
- Complete set of construction drawings drawn to scale, including:
- **Foundation Plans** (incl. size of walls, footings, and piers)
 - **Floor Plans** (incl. overall dimensions, plumbing fixtures, structural information, door and window sizes, lintel details, and roof framing details such as size, direction, span and spacing)
 - **Building Elevations** (4) from all sides showing grade location, floor height above grade, wall height, roof height, roof slope, cladding material, roofing material, and window and door location and sizes.
 - **Cross Sections** (1 min) through the wall from footings to roof noting all materials in the foundation, wall, and roof assembly.
 - **Other Details that may be required:**
 - Roof truss layout
 - Engineered product specifications and layouts
- Plumbing or washrooms included in the accessory building require a letter from a licensed installer or professional engineer verifying the location of the existing septic system, tile bed size, and capacity of the existing tank, can accommodate the proposed work (if applicable)
- Alterations to the septic bed or tank to accommodate the added fixtures will require a separate permit
- An approved Nutrient Management Strategy (NMS) is required prior to construction if one or more of the following conditions are met:
- A building permit application is sought for constructing or expanding a livestock barn or manure storage facility
 - Construction or excavation of a manure storage facility made of earth (i.e., earthen lagoon)
 - Livestock numbers on the farm are equivalent to or greater than 300 NU
 - The farm receives off-farm material for treatment through an anaerobic digester (AD), if the AD system is a regulated, mixed-AD system under the NMA regulations
 - The farm had an NMS previously, and is located within 100 metres of a municipal well
 - A change in ownership or control of a farm operation with a previously approved NMS adversely affects the capacity to implement the existing NMA

For more information on an approved Nutrient Management Strategy, contact the [Ontario Ministry of Agriculture, Food and Agribusiness and Ministry of Rural Affairs](#)

☐ Grading Review

- To determine if a grading plan is or is not required for your building permit application, you can send your site plan to the Grading Department at grading@brant.ca, or contact them directly for additional information

Next steps:

- Submit the complete permit application and supporting documents through the [County of Brant website](#)
- The application is reviewed for completeness, compliance with the zoning by-law, applicable laws, and lot grading approval. Comments are provided during review to identify any outstanding requirements and to summarize all applicable fees.
- When all fees are paid, the plans are reviewed for compliance with the Ontario Building Code. The permit is issued when review is complete, and fees are paid.
- Once construction begins, inspections must be scheduled. Building inspectors review major phases of construction until occupancy and/or final is complete.
