

Wood Burning Appliances

A building permit is required for the installation of a new or used wood stove, new chimney, factory-built fireplace, or hearth-mounted stove inside of or attached to a building and must comply with the Ontario Building Code for clearances from combustible materials.

A building permit is not required for outdoor furnaces if the building in which they are enclosed is under 10 square metres (108 square feet).

Permit application submission requirements:

This checklist provides a summary of the Building Permit submission requirements for a wood burning appliance and has been developed for convenience purposes only. The property owner is responsible for ensuring compliance with all County of Brant By-laws, other applicable laws, and the Ontario Building Code.

- Permit applications to be filled out and signed
- Authorization form (if applicable)
- Complete set of construction drawings drawn to scale, including:
 - **Foundation Plan and Section** (for masonry fireplaces and chimneys, where applicable)
 - **Floor Plan** of the room or area in which the appliance is being installed
 - **Cross Section** of the appliance and associated construction (except where adequate information is provided within the appliance brochures/manuals)
 - **Other Details:**
 - Proof of ULC# or CSA#, also located on the plate on the back of the stove
 - Copy of the appliance and/or chimney manuals
 - Age of structure and information on existing ventilation

Next steps:

- Submit the complete permit application and supporting documents through the [County of Brant website](#)
- The application is reviewed for completeness, compliance with the zoning by-law, applicable laws, and lot grading approval. Comments are provided during review to identify any outstanding requirements and to summarize all applicable fees.
- When all fees are paid, the plans are reviewed for compliance with the Ontario Building Code. The permit is issued when review is complete, and fees are paid.
- Once construction begins, inspections must be scheduled. Building inspectors review major phases of construction until occupancy and/or final is complete.
