

## Shipping Containers as Accessory Structures

As defined by the Zoning By-Law, a shipping container is a standardized steel structure, or similar, which is typically used for intermodal freight transport or storage but may be modified for other uses, aesthetic purposes, or to be used as a component of building construction.

A building permit is required for the placement of a shipping container with an area greater than 10 square metres (108 square feet).

A shipping container placed on a property for the purposes of permanent storage is considered an accessory structure and would not require a permit if the shipping container:

- is not more than 15 square metres (161 square feet),
- is not more than one storey in building height,
- is not attached to a building or any other structure,
- is used only for storage purposes ancillary to a principal building on the lot, and
- does not contain plumbing.

### Building permit application submission requirements:

In many instances, before a building permit application can be processed and a permit issued, there are other approvals from other agencies that are required. These approvals are not administered by the Building Division and are required as part of a complete application package. Please consult the applicable law checklist prior to applying for a building permit.

This checklist provides a summary of the Building Permit submission requirements for shipping containers and has been developed for convenience purposes only. The property owner is responsible for ensuring compliance with all County of Brant By-laws, other applicable laws, and the Ontario Building Code.

- Permit applications to be filled out and signed
- Authorization form (if applicable)
- Site plan, including:
  - The address or roll number (beginning with 2920) of the property
  - All property lines and surrounding streets labelled
  - All proposed and existing buildings and structures on the property labelled
  - Proposed distance from all legal property lines (not street lines, sidewalks, etc.)
  - Location of septic system (if applicable) and distance to proposed structure(s)
- Complete set of construction drawings completed by a Professional Engineer and drawn to scale, including:
  - **Foundation Plans** (incl. anchorage details, size of walls, footings, and piers)
  - **Shipping container structural specification drawings** (incl. overall dimensions, structural information, container specifications)

□ Grading Review

- To determine if a grading plan is or is not required for your building permit application, you can send your site plan to the Grading Department at [grading@brant.ca](mailto:grading@brant.ca), or contact them directly for additional information

**Next steps:**

- Submit the complete permit application and supporting documents through the [County of Brant website](#)
- The application is reviewed for completeness, compliance with the zoning by-law, applicable laws, and lot grading approval. Comments are provided during review to identify any outstanding requirements and to summarize all applicable fees.
- When all fees are paid, the plans are reviewed for compliance with the Ontario Building Code. The permit is issued when review is complete, and fees are paid.
- Once construction begins, inspections must be scheduled. Building inspectors review major phases of construction until occupancy and/or final is complete.
