

## Stages and Support Structures

### What is a demountable stage?

Demountable stage means a structure that:

- Consists of one or more platforms together with any wall, roof, or other structures attached to or located on any of the platforms,
- Intended to be used for public or private performances or events, other than performances or events associated with movie or television productions,
- Is intended to be erected, assembled, or installed for a limited, specified time,
- Is capable of being dismantled at its location and moved to be reconstituted elsewhere, or is erected for one-time use,
- Is not located inside a fully enclosed building,
- Is primarily for use by performers and workers, and
- May or may not be mounted on wheels

### What is a demountable structure?

Demountable support structure means any structure that:

- Is capable of supporting banners, stage sets, props, sound equipment, lighting equipment, or other equipment,
- Is intended to be used for public or private performances or events, other than performances or events associated with movie or television productions,
- Is intended to be erected, assembled, or installed for a limited, specified time,
- Is capable of being dismantled at its location and moved to be reconstituted elsewhere, or is erected for one-time use
- Is not attached to or located on a demountable stage,
- Is not located inside a fully enclosed building,
- Is primarily for use by performers and workers, and
- May or may not be mounted on wheels

### Is a Building Permit Required?

Building permits are required for stages and support structures if they meet the following criteria:

- More than 60 square metres (645 square feet) in area,
- More than 225 square metres (2,421 square feet) in combined area,
- More than 3 metres in height above adjacent grade level,
- Any part of the platform or any roof, wall, or structure attached to or on any part of the platform is 5 metres or more in height above adjacent ground level,
- Designed to carry superimposed loads greater than 115 kilograms, or
- Would create a hazard to the public

## Permit application submission requirements:

In many instances, before a building permit application can be processed and a permit issued, there are other approvals from other agencies that are required. These approvals are not administered by the Building Division and are required as part of a complete application package. Please consult the applicable law checklist prior to applying for a building permit.

This checklist provides a summary of the Building Permit submission requirements for temporary demountable stages and support structures and has been developed for convenience purposes only. The property owner is responsible for ensuring compliance with all County of Brant By-laws, other applicable laws, and the Ontario Building Code.

- Permit applications to be filled out and signed
- Authorization form (if applicable)
- Commitment to General Review form completed by all consultants on the project
- Stages and Support Structures Information Form
- Site plan, including:
  - The address or roll number (beginning with 2920) of the property
  - All property lines and surrounding streets labelled
  - All existing buildings and structures on the property labelled
  - The location and dimensions of the stage or support structure
  - The setback(s) to the property lines and existing buildings and structures
  - The location of any fire safety provisions (location of fire hydrants, fire extinguishers, and fire access routes)
- Complete set of structural construction drawings completed by a professional engineer denoting all structural design criteria, foundation reinforcement, and structural design of the building

## Next steps:

- Submit the complete permit application and supporting documents through the [County of Brant website](#)
- The application is reviewed for completeness, compliance with the zoning by-law, applicable laws, and lot grading approval. Comments are provided during review to identify any outstanding requirements and to summarize all applicable fees.
- When all fees are paid, the plans are reviewed for compliance with the Ontario Building Code. The permit is issued when review is complete, and fees are paid.
- Once construction begins, inspections must be scheduled. Building inspectors review major phases of construction until occupancy and/or final is complete.

# COMMITMENT TO GENERAL REVIEWS BY ARCHITECT AND ENGINEERS

THIS FORM TO BE COMPLETED BY THE OWNER OR OWNER'S AUTHORIZED AGENT, AND SIGNED BY ALL CONSULTANTS RETAINED FOR GENERAL REVIEWS

## Part A - Owner's Undertaking

Permit Application No.

Project Description:

Address of Project:

Municipality:

**WHEREAS** the Ontario Building Code requires that the project described above be designed and reviewed during construction by an architect, professional engineer or both that are licensed to practice in Ontario;

**NOW THEREFORE** the Owner, being the person who intends to construct or have the building constructed hereby warrants that:

1. The undersigned architect and/or professional engineers have been retained to provide general reviews of the construction of the building to determine whether the construction is in general conformity with the plans and other documents that form the basis for the issuance of a building permit, in accordance with the performance standards of the Ontario Association of Architects (OAA) and/or Professional Engineers Ontario (PEO);
2. All general review reports by the architect and/or professional engineers will be forwarded promptly to the Chief Building Official, and
3. Should any retained architect or professional engineer cease to provide general reviews for any reason during construction, the Chief Building Official will be notified in writing immediately, and another architect or engineer will be appointed so that general review continues without interruption during construction.

**The undersigned hereby certifies that he/she has read and agrees to the above**

Name of Owner:

Date:

Address of Owner:

Telephone:

Signature of Owner:
